EDUCATION

Madhav Institute of Technology and Science, Gwalior B.Tech in Electronics Engineering	2023 – 2027 CGPA: 7.2
Balak Mandir High School, Gwalior Class XII (MP Board)	2022 – 2023 68.8%
Delhi Public School, Gwalior Class X (CBSE)	2020 – 2021 83%

SKILLS

Languages: Python, SQL
Backend: FastAPI, RESTful API Development
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming
Machine Learning: Supervised Learning, Linear Regression, Classification, Model Evaluation
Libraries/Tools: NumPy, Pandas, Matplotlib, Scikit-learn, Streamlit
Frontend/Frameworks: React, Monaco Editor
Version Control: Git, GitHub
Tools: MySQL, Jupyter Notebook, VS Code, Cursor IDE
Other: Operating Systems, Computer Networks, Software Engineering
Soft Skills: Communication, Leadership, Teamwork, Critical Thinking

PROJECTS

AI Mock Interview Platform | React, FastAPI, Python, Monaco Editor, Groq API, Whisper [View Project]

- Architected a full-stack mock interview platform supporting coding challenges, technical Q&A, and voice-based interviews, covering the complete interview lifecycle from resume ingestion to AI-generated performance feedback.
- Engineered a modular FastAPI backend for resume parsing, LLM-powered question generation using Groq API, real-time speech transcription with Groq Whisper, and automated evaluation scoring.
- Integrated Monaco Editor with multi-language coding support and per-question timer locking to simulate realistic interview constraints and prevent answer modification after time expiry.
- Shipped a responsive React frontend using AI-assisted development, managing session state, timed interview flows, and multi-modal answer inputs.
- Built a voice interaction pipeline using Groq Whisper for speech-to-text and the Web Speech API for text-to-speech interviewer simulation, with replace/extend transcription controls and structured feedback reporting.

Student Marks Predictor | Python, Scikit-learn, Pandas, Matplotlib, Streamlit [View Project]

- Built a regression model to predict student scores using study hours, sleep, and attendance data.
- Evaluated performance using MAE, MSE, RMSE, and R^2 metrics.
- Visualized trends and model performance using Matplotlib.
- Created an interactive web interface for predictions.

EXPERIENCE

Summer Internship Program (Power BI)	Dec 2024
– Performed data cleaning and transformation for analysis. – Built interactive dashboards using Power BI. – Generated insights using charts, filters, and reports.	

ACHIEVEMENTS

- Earned Intermediate SQL Badge and Python (Basic) Certificate from HackerRank.
- Finalist among 400+ teams in Frontend Battle 2K26 at MITS Gwalior.
- Completed a Generative AI Masterclass focused on prompt engineering and AI tools.
